

BOBBY JINDAL
GOVERNOR

KRISTY H. NICHOLS
COMMISSIONER OF ADMINISTRATION

State of Louisiana
Division of Administration
Office of Technology Services

February 4, 2015

LaGov Memorandum 15-007

To: LaGov Technical Coordinators

Subject: Workstation Changes required for LaGov/LEO users

Reminder: March 9, 2015

SAP GUI 7.30 and Launch LaGov version 1.01 will be required for all LaGov user machines beginning on March 9, 2015. On this date, users accessing LaGov from non-compliant machines will not be able to access the ECC component of LaGov (see [LaGov memo #15-005](#)).

New: February 22, 2015

All LaGov web based applications, to include LEO, will no longer accept SSL (Secure Sockets Layer) connectivity as of Sunday, February 22, 2015. In order for employees to access the LaGov ERP and LEO portals as of this date, they must have **TLS active** in their browser settings.

To verify, click Internet Explorer > Internet Options > Advanced settings and locate these options toward the end of the list. At least the TLS 1.0 option must be selected.

- ☐ Use SSL 2.0
- ☐ Use SSL 3.0
- ☒ Use TLS 1.0
- ☐ Use TLS 1.1
- ☐ Use TLS 1.2

While LaGov will no longer require SSL, before deselecting, be sure that all other applications used by your agency also do not require it.

If you have any additional questions or require assistance, please email DOA-OTS-LAGOV-USERADMIN@LA.GOV.
